Summary

Motivated Computer Science student and aspiring Backend Developer with a strong foundation in software engineering, backend development, and modern web technologies. Skilled in building structured, maintainable, and scalable backend solutions with a strong interest in API architecture, system design, and agile development. Known for analytical thinking, adaptability, and project coordination skills.

Skills

Programming Languages: Python, C++, JavaScript, HTML5, CSS3

Frameworks & Libraries: FastAPI, Django, REST APIs, Bootstrap

Tools & Technologies: Git, GitHub, SQL, VS Code

Development Areas: Backend Development, API Architecture, Web Development, Database Management, System Design

Projects

MindBridge – AI-Powered Mental Wellness Platform

- Built an AI-powered mental wellness platform that supports users through emotional reflection, guided assistance, and psychiatrist-style conversations.
- Implemented three core modes: Mirror Mode for self-reflection, Guide Mode for structured support, and Psychiatrist Mode for deeper AI-based conversation.

DogQuest – Dog Marketplace Platform for Ireland

- Developed a dog marketplace platform for Ireland where users can create listings, search dogs, and connect with sellers or service providers.
- Worked on key marketplace features including listing management, user profiles, search functionality, and structured data handling.
- Built backend logic to support smooth marketplace operations and improve the user experience for buyers and sellers.

Follow Up Timer – Productivity & Follow-Up Management Tool

- Created a productivity tool that helps users manage follow-ups, reminders, and communication tasks across Gmail and other apps.
- Developed reminder scheduling and notification workflows to reduce missed follow-ups and improve task consistency.
- Designed the system with integration-focused logic to support email-based productivity and workflow automation.

Education

Bachelor of Science in Computer Science

Jan. 2023 – Expected 2027

University of Management and Technology, Lahore, Pakistan

- Currently maintaining strong academic standing into the Final year.
- **Relevant Coursework:** Data Structures and Algorithms, Database Management Systems, Software Engineering, Operating Systems, and Web Development.
